

# Nada Mahmoud

Backend Developer — Node.js

📍 Cairo, Egypt | ✉ [nadamahmoud7344@gmail.com](mailto:nadamahmoud7344@gmail.com) | ☎ +20 115 706 0840 | [LinkedIn](#) | [GitHub](#)

---

## SUMMARY

Backend Developer with hands-on experience building backend applications, RESTful APIs, and authentication systems using modern JavaScript technologies. Interested in scalable architecture, backend security, and building reliable production-ready systems.

---

## EXPERIENCE

---

### Backend Development Intern — Node.js | Route Academy

2025 – 2026

- Built and delivered RESTful APIs and scalable backend applications using Node.js, Express.js, MongoDB, and MySQL — following MVC architecture, clean code principles, and API security best practices.
- Developed and shipped 4+ backend projects end-to-end, applying best practices in API design, security, and performance across all stages of the development lifecycle.

---

## TECHNICAL SKILLS

**Backend Development:** Node.js, Express.js, NestJS, TypeScript, REST APIs, GraphQL, Socket.IO, MVC Architecture, Middleware, Server-Side Rendering (EJS)

**Databases & ORMs:** MongoDB, Mongoose ODM, MySQL, Sequelize ORM, Redis, Aggregation Pipeline, Database Relationships, Indexing, Query Optimization

**Authentication & Security:** JWT Authentication, Refresh Tokens, RBAC, OAuth2 (Google Login), Session Management, Email Verification, OTP Verification, Bcrypt, API Security

**Validation & Features:** Joi Validation, Pagination, Filtering, Search, File Uploads (Multer)

**Tools & Deployment:** Docker, Git, GitHub, Postman, AWS Basics, Vercel, VS Code

**Programming Foundations:** JavaScript (ES6+), OOP, Data Structures & Algorithms, Design Patterns

---

## PROJECTS

---

### Saraha — Anonymous Messaging | [GitHub](#)

2026

Node.js · Express.js · MongoDB · JWT · Google OAuth2 · Nodemailer

- Built a full-scale backend system from scratch supporting user authentication, anonymous messaging, and profile management — following industry-standard security practices.
- Integrated Google OAuth2 login, JWT-based session management, and automated email flows for OTP verification and password reset.
- Applied production-level API best practices including input validation, role-based authorization, file uploads, and third-party security middleware.

### Social Media Platform — REST API | [GitHub](#)

2026

TypeScript · Node.js · Express.js · MongoDB · Redis · Socket.IO · GraphQL · AWS S3

- Built a full-featured social media backend in TypeScript supporting posts, comments, real-time notifications, and live comment streaming via Socket.IO.

- Implemented a complete auth system with JWT, refresh tokens, Google OAuth2, OTP email confirmation, logout, and forgot-password flows.
- Integrated Redis caching, AWS S3 file uploads (Multer), GraphQL API layer, and automated email hooks using Node.js event-driven architecture.

## EDUCATION

---

**Bachelor's Degree in Computer Science | Cairo University**

2021 – 2025

## LANGUAGES

---

**Arabic** — Native   |   **English** — Professional Working Proficiency
